

**TF023V: TERRAFIRMA MEDIUM LOAD COIL SPRINGS (PAIR) - +2" LONGER – REAR****DEFENDER 90, DISCOVERY 1, DISCOVERY 2 & RANGE ROVER CLASSIC****FITTING INSTRUCTIONS****90, DISCOVERY 1 AND RANGE ROVER CLASSIC FITMENT.**

1. Put the car into gear or park and apply the hand brake, loosen the rear wheel nuts on one side, raise the vehicle on a trolley or bottle jack under the axle and then support the vehicle with an axle stand under the chassis. It's easier and safer to do this job one side at a time.
2. Remove the rear wheel
3. Undo the top shock absorber retaining nut and pull the shock absorber off of the chassis mounting pin. (this is just to allow the axle to be lowered)
4. Undo the 2 bolts which hold the spring retaining plate in place.
5. Gently lower the axle on the jack, the axle will lower the spring away from the chassis and the spring will become loose. Once this happens stop lowering the axle and remove the old spring
6. Clean the spring seat and retaining plate, fit the new spring, ensuring you use the correct spring for the side of the vehicle you are changing as the springs are normally handed.
7. Refit the spring retaining plate tighten the bolts making sure the retaining plate is holding the spring tightly in place.
8. Gently raise the axle back up using the jack and ensuring the spring relocates into the top chassis mount.
9. Refit the top of the shock absorber onto the chassis mount pin and tighten the nut.
10. Refit the wheel, lower the car off of the axle stand and torque the wheel nuts correctly.
11. Repeat the procedure on the other side.

DISCOVERY II FITMENT.

1. Put the car into gear or park and apply the hand brake, loosen the rear wheel nuts on one side, raise the vehicle on a trolley or bottle jack under the axle and then support the vehicle with an axle stand under the chassis. It's easier and safer to do this job one side at a time.
2. Remove the rear wheel.
3. Undo the nut on the bolt that goes through the top of the shock absorber and the bracket on the chassis and then remove the bolt. (this is just to allow the axle to be lowered).
4. Gently lower the axle on the jack, the axle will lower the spring away from the chassis and the spring will become loose. Once this happens stop lowering the axle and remove the old spring.

WARRANTY & DISCLAIMER - TerrafirMa products are warranted free from defects in materials and workmanship for a period of 12 months from the date of retail invoice. TerrafirMa does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws. This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind.
