

TFFRK: TERRAFIRMA FUEL FILTER RELOCATOR

DEFENDER 90 / 110 / 130, DISCOVERY 1 & RANGE ROVER CLASSIC

FITTING INSTRUCTIONS

This kit is designed to allow the repositioning of the fuel filter housing on Td5 and puma vehicles when fitted with TF519 top shock mounts.

Unclip the fuel pipes leading to the filter head in both directions to allow adequate stress free movement of the pipes.

With TF519 top shock mount fitted as pictured left remove the bolts securing both filter housing and backing plate from the chassis, using the M8 countersunk bolts bolt the relocation plate on to the chassis using the aluminium spacers to allow the plate to stand proud.

As seen below.

Discard the tin backing plate and using the original bolts remount the filter head to the plate using the top two holes. If necessary slacken and adjust the top shock mount position to allow more clearance around the fuel pipes.

Secure the fuel pipes against the chassis ensuring that you don't stress the pipes as the plastic ends can get damaged easily.

Note: The backing plate can still be re-fitted but will require extensive modification.
